

1 Company Setup

- Sign in → Create Company → Enter Name, Industry, Accounting Method
 - ⚙️ Gear → Account & Settings →
 - Company: Name, currency, fiscal year
 - Advanced: Enable chart of accounts numbers, class/location tracking
-

2 Chart of Accounts Essentials

- Accounts Receivable (AR) → Asset
- Accounts Payable (AP) → Liability
- Bank Account → Asset
- Sales / Service Income → Income
- COGS → Expense
- Expenses → Expense

Tip: Add custom accounts if needed.

3 Customers & Vendors

- Customers → Sales → Customers → New Customer
 - Sample: ABC Traders, Metro Solutions
 - Vendors → Expenses → Vendors → New Vendor
 - Sample: Fast Supplies, Tech Warehouse
-

4 AR Workflow (Sales & Receivables)

Step 1 — Create Invoice

Sales → Invoices → New Invoice

- Customer: ABC Traders
- Item: Laptop Model X, Qty 2 @ 50,000
- Total: 100,000 PKR

Step 2 — Receive Payment

Sales → Invoices → Receive Payment

- Deposit To: Undeposited Funds

Step 3 — Bank Deposit

+ New → Bank Deposit → Select Payment → Deposit to Bank

Result: AR cleared & cash in bank.

5 AP Workflow (Purchases & Payables)

Step 1 — Enter Vendor Bill

+ New → Bill

- Vendor: Fast Supplies

- Item: Laptop Model X, Qty 2 @ 40,000

- Amount: 80,000 PKR

Step 2 — Pay Bill

+ New → Pay Bills → Select Vendor & Bill → Payment Account → Record Payment

Result: AP reduced & bank updated.

6 Key Reports

- AR Aging Summary
 - AP Aging Summary
 - Balance Sheet
 - Profit & Loss
 - Transaction List by Customer / Vendor
-

Tips

- Use **Undeposited Funds** for batch payments.
- Always check AR/AP reports after transactions.
- Categorize items properly (Income, COGS, Expense).
